DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Invention II in the reply filed on 4/25/2006 is acknowledged.

The traversal is on the ground(s) that the claims meet unity of invention. This is not found persuasive because the methods of Invention II do not require the control element of Invention I. Further, Inventions II and I are classified under subclasses 108 and 150 that are examined by two different art units, AU2857 and AU2863.

The requirement is still deemed proper and is therefore made FINAL. Therefore, claims 10-14 and 22 have been withdrawn from further consideration.

Information Disclosure Statement

The information disclosure statement filed 03/25/05 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Copies of the following EP foreign documents have not been submitted: 0857949 and 0800059.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2863

Claims 15-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

With respect to claims 15-21, the methods for testing a measuring system for correct functioning do not produce any tangible results. The practical application of the claimed invention cannot be realized until the information determined is conveyed to the user. For the result to be tangible, it would need to output to a user, displayed to a user, stored for later use, or used in any tangible manner. Hence, the claims are treated as nonstatutory functional descriptive material (See MPEP Sec. 2106 and <http://www.uspto.gov/web/offices/com/sol/og/2005/week47/patgupa.htm>).
